MODULEN[®] IBD

Administration and dosage

One 350g Modulen[®] IBD tin provides 1750 kcal. The dosage of Modulen[®] IBD is dependent on the age, weight and clinical condition of the patient. The recommended feed concentration is 1 kcal/ml (20%). As a guide, Modulen[®] IBD can also be concentrated to provide 1.25 kcal/ml (25% concentration) or 1.5 kcal/ml (30% concentration) but additional fluid should be advised.

Preparation Instructions

Use the dosage scoop included in the tin.

1. Wash hands thoroughly. Follow the mixing table and select the volume required.
2. Measure cool boiled or bottled water (room temperature) and pour into a clean bowl or container.
3. Scoop and level the desired amount of powder using the scoop in the tin or weigh in grams.
4. Add the powder to the water and immediately stir until well mixed
5. After use, store the scoop inside the can.
